

European Equine Health & Nutrition Congress on
Thursday 23th and Friday 24th of March | Follow on Paardenarts.nl
(via short video-updates with practical advice from experts)

The European Equine Health and Nutrition Congress (EEHNC) is a biannual congress and has grown over the years as a leading international event uniting equine nutritional and veterinary specialists from around the world to share innovative ideas on equine health and nutrition. The Congress attracts a group of equine practitioners, researchers, nutritionists and equine professionals from more than 20 countries around the world. The 8th EEHNC will be organised on March 23-24, 2017, in the historic surroundings of the city centre of Antwerp (Belgium). The theme of the congress is 'From Nutrition to Disease and Back'.

Special attention will be paid to the interaction between nutrition and conditions like obesity, equine gastric ulcer disease and developmental orthopaedic disease. Furthermore, topics like feeding thin and starved horses, feeding geriatric horses, weight loss programmes, vitamin E, donkey nutrition, and joint supplements will provide lessons for practical feeding. The congress has a scientific approach and English will be the main language. Various international specialists on horse nutrition and health will consecutively share video-updates. In these video-updates they will give horse owners tips and tricks. At the end of the congress there will be a round table discussion, which can be followed live via live stream.

[Paardenarts.nl](#) will report at several moments via [Facebook](#) en [LinkedIn](#) during these two days of congress.

The 8th EEHNC is organised in cooperation with departments from the Faculties of Veterinary Medicine of Ghent University, Utrecht University and the University of Liege. The Animal Science Group (Wageningen University and Research Centre) is also involved. Cavalor is enabling this congress as the main sponsor and organiser of this event.

EEHNC | Congress program

The main theme of this 8th edition is 'From Nutrition to Disease and Back'. The agenda consists of lectures by internationally acclaimed specialists in the areas of nutrition and veterinary science. The two-day program will contain 3 main sessions:

- "Nutrition as Cause"
- "Nutrition as (part) treatment or disease modifying tool"
- "Nutrition as tool for disease prevention"
